LESS CANCER

Founded in 2004, the Next Generation Choices Foundation is a 501(c)(3) public charity known more widely as "Less Cancer." The organization works to educate the public, create proactive public policies, and offer continuing education credit to physicians, nurses, and public health professionals regarding cancer, over 50% of which are preventable.

We share our message with the general public, elected officials, and the medical community through the digital media and community-supported programming.

Our Approach: Educate. Advocate. Participate.
